

SunSource Energy

Environment, Health and Safety Policy

21/02/2019

We at SunSource Energy Group are committed to ensure environment, health and safety objectives by active participation, involvement and communication by all our Employees, Sub – Contractors & Vendors who works with us or on behalf of us.

Environment -

SunSource Energy Group as a part of its business activity, continually works to lower Green House Gas (GHG) emissions across India and the world. As part of its work, SunSource Energy Group strives to and is committed to continual improvement of the environment. We do this by motivating, promoting and supporting corporates and institutions, both government and non-government to adopt green energy and reduce energy consumption and costs. We also work to improve environment by prudent waste management and water consumption across all our facilities.

Health and Safety -

We are also committed towards health and safety of the personnel who are working on behalf of us at various locations. We will ensure:

By taking following measures

- Ensuring Hazard Identification and risk assessment of each activity we do.
- Ensuring adequate communication channel for implementation of H&S related updates.
- Providing adequate resources to carry out their task.
- Providing various trainings for health and safety like Induction, Refresher trainings, and job specific trainings to new joiners and sub-contractor personnel.
- Motivating them for their active participation in health and safety forum.
- Periodically performance evaluation of employees and sub-contractors to build robust safety culture.
- Complying with all legal and other regulatory guidelines applicable with all states and countries where we work.
- Periodic management review of EHS policy so it remains relevant and communicating the same to all concerned.
